**PIXELINK μSCOPE**

Pixelink μScope is a software tool developed for the Microscopy marketplace. It gives users the ability to quickly and easily capture, measure and enhance images. In addition to this it can also correlate image data effectively and output data in a format that can be further analysed by other software packages.

Pixelink μScope Essentials (ES) software is an easy-to-use robust image capture tool optimized for productivity. Pixelink μScope Standard (SE) Software has added features, making it a highly productive image capture tool for microscope. Pixelink μScope Pro (PRO) Software is for users needing more advanced tools for their microscopy requirements. This feature-rich applications includes tools such as z-axis, extended focus imaging, shading correction, and reflected light subtraction.

**PIXELINK SDK**

Providing full control of all camera functions, the Pixelink Software Development Kit (SDK) is the software package of choice for developers and system integrators who are integrating Pixelink cameras into their applications. The Pixelink SDK provides access to the full Pixelink Application Programming Interface (API) and provides sample applications, wrappers for many 3rd party controls, such as LabVIEW, along with full documentation.

The Pixelink SDK is compatible with Microsoft Windows and popular Linux platforms. When using the Pixelink SDK, developers can integrate Pixelink cameras into their applications with ease.

**PIXELINK CAPTURE**

Pixelink Capture is powerful multi-camera software application designed to configure “n” number of cameras and stream “n” number of cameras simultaneously in real-time high-quality video viewed in a multi-window environment. It offers options for complex image enhancements such as exposure control and filtering, in addition to multi-camera application testing and configuration.

Pixelink Capture features allows you to measure supporting point, line, circle, rectangle, polyline and polygon measurements while determining pixel location. The user can review and adjust data before exporting the findings to an Excel spreadsheet for further analysis.

Pixelink Capture also has integrated lens control (zoom & focus) for Navitar motorized lenses and accurate autofocus options for Navitar motorized fine focus mechanisms.
